

## Managed Hybrid Cloud

A managed hybrid cloud is a seamlessly integrated, fully managed end-to-end cloud service that integrates both private and public cloud to deliver a scalable technology platform designed to meet your specific business requirements.

You can run services where you need to, ensuring the security of your business-critical data, while retaining excellent flexibility and operational effectiveness.

We will work with you to understand your needs and challenges and will then design, build, migrate and provide ongoing 24x7 support and management for your hybrid cloud infrastructure.

The hybrid cloud is perfect for functions such as:

- ✧ For development and testing workloads.
- ✧ For E-Commerce, ensuring compliance.
- ✧ For when you need to flex using cloudbursting.
- ✧ Backup and disaster recovery.
- ✧ When you need to ensure high availability.
- ✧ When legacy systems need to be integrated with the cloud.

Our experienced team of engineers will support you on your hybrid cloud journey and ensure that you get a flexible, cost-effective solution that meets your organisational needs.

## Managed Hybrid Cloud Benefits

- ✔ **A hybrid cloud is a cost-effective IT infrastructure model.**

Place non-critical data and applications in a cheaper, public cloud environment and only host more secure applications data in your private cloud or on-premise. Benefit from improved performance, lower capital expenditure costs and lower hardware and data centre management costs.
- ✔ **Add operational resilience to legacy or cloud platforms.**

Prolong the life of existing applications over time by migrating them to the cloud, removing their reliance on ageing hardware. It is easy to carry out test and proof-of-concept exercises to ensure cloud suitability prior to a full migration.
- ✔ **You can use the best cloud service for your business needs.**

Some applications are best hosted in Microsoft Azure, others Amazon AWS and yet others in a private cloud or on-premise. By adopting a hybrid approach, you can flexibly connect all of those models and have them all managed by a single point of contact who will support you 24x7.
- ✔ **Use the power of known and trusted public cloud platforms to de-risk your transition to cloud computing.**

Often the move from an on-premise to cloud solution can seem to be risky. Reduce that risk by migrating some of your less critical applications and data to known public cloud providers, while keeping other applications and data on-premise.

Discover whether a hybrid cloud is right for your business.

Our engineers are on hand to make your journey to the cloud a seamless one.

Discuss your Managed Hybrid Cloud needs by calling us on +44 203 034 2244 or +1 323 984 8908, or emailing [hello@cardonet.com](mailto:hello@cardonet.com)

### Our Technology Partners

## Managed Hybrid Cloud Features

- ✧ Integrated management of computing, hosting and storage environments.
- ✧ Keep secure data in the private cloud and other data in the public cloud.
- ✧ Supports all business critical and operational applications and services.
- ✧ Predictable monthly costs based on resource usage.
- ✧ Flexibility to adapt based on your changing requirements.
- ✧ Local capability for sites with bandwidth performance challenges.
- ✧ Improved reliability and resilience of infrastructure.
- ✧ Greater cost and energy efficiency.

## Managed Hybrid Cloud Options

- ✧ Resource options: compute, storage and networking.
- ✧ Management options.
- ✧ Operating system options.
- ✧ Integration of bespoke applications.

## Allowing you to do more

- ✧ Deliver a better user experience.
- ✧ Remove the demand on internal IT resources.
- ✧ Greater flexibility for data access/sharing and information exploitation.
- ✧ Drive growth on a more secure, dedicated platform.
- ✧ Future-proof your business.
- ✧ Manage risk through continuity, backup, mirroring and security features.
- ✧ Rest easy knowing you can add or remove resources on demand.
