

## Video Conferencing Solutions

Expand your collaboration efforts, reduce your travel costs and simplify your operations with the introduction of a secure and proven video conferencing solution.

Working with a number of leading video conferencing vendors, our experienced team will ensure that you benefit from the introduction of a video solution that meets your needs both now and in the future. We will expertly install your video conferencing solution, train you in the use of it and then will fully maintain and support it for you.

Our video conferencing solutions allow your team and external participants to communicate, share, present and discuss thoughts and ideas just like they would if they were there in the same room.

Using standards-based systems, we are able to deploy endpoints from a variety of leading providers and can ensure video conferencing interoperability between different systems.

Our video conferencing solutions are perfect for:

- ✧ Board and conference rooms.
- ✧ Small collaboration rooms.
- ✧ Desktop and mobile operations.
- ✧ Remote teams and people.

Whether it is a large video conference, one-to-one video calls or a team meeting, our user-friendly video conferencing solutions are designed to enhance your productivity and provide you with seamless collaboration.

## Video Conferencing Solution Benefits

- ✓ **A reduction in your travel time and costs.**

You won't be directly responsible for the maintenance or support of the system as that is covered by your hosted cloud telephony provider. Additionally, updates will be rolled out automatically as they become available without the need to purchase additional licensing or incur additional costs. Lastly, your hosted cloud telephone system management and configuration is easy through a simple and clear web interface, making moves, adds and changes stress-free and fast.
- ✓ **Increased productivity and improved collaboration.**

A hosted cloud telephone system by default offers you substantial assistance with your disaster recovery and business continuity planning. Should you be unable to access your workplace for any reason, your team would be able to access your telephone system from anywhere else using a variety of devices, including their own smart phones. You won't miss vital communications and will be able to collaborate normally as you put your other disaster recovery plans into operation.
- ✓ **Improved attendance and better structure.**

Hosted Cloud Telephone Systems typically have less security vulnerabilities compared to onsite telephone systems. They are generally hosted in secure and reliable private cloud environments and are replicated to secondary, secure locations. By default, they are hosted on secure infrastructure with multiple layers of security and high-level encryption.
- ✓ **Enjoy a consistent and significant competitive advantage.**

Combined, the introduction of video conferencing will allow you to be more agile, providing you with a strong competitive advantage. With more productive meetings, less travel, lower costs and improved team collaboration, you can streamline your operations and be a lot more agile than your competition.
- ✓ **Better employee retention.**

Having fewer requirements for travel requirements allows your team to enjoy a better work/life balance. It also allows for more home working, reducing the cost and impact of of commuting. As a remote worker, one can still have a close relationship with other members of their team.

Unlock the benefits of **video conferencing** for your organisation.
