

## Managed Backup

Your business needs fast, resilient and highly secure managed backup services that massively reduce your business risk by guaranteeing the safety of your critical data.

The consequences of permanent or large-scale data loss are well-known and are potentially devastating to your business. You could experience a loss of custom, reputational damage, you could be in breach of industry regulations etc. Additionally, working to repair the damage can be both expensive and resource-intensive.

We can provide you with a managed backup service that will meet your policies, requirements and timeframes in order to reduce the risk to your business.

You need to know that your mission-critical data is safe, secure and recoverable. Our managed backup services can be adapted to your specific business and data requirements, be that on-premises, collocated in a data centre or backed up to a dedicated cloud server.

You are able to choose how your data is stored, where it is replicated, which devices you would like protected, the frequency of your backups and the length of time you would like to have your backups available for.

## Managed Backup Benefits

### ✔ Protection of your mission-critical applications and data.

With ever present cyber-security incidents on the rise, for example, you need to know that should the worst happen, you are in a position where you can easily restore your mission-critical applications and data from a reliable backup.

### ✔ Being able to optimise your operations.

By outsourcing your backups to a trusted IT Services provider, you can focus your internal resources on your team, your systems and your data, without having to worry about whether backups are taking place and whether they are being successful. You are in safe, proven hands.

### ✔ Avoid the high costs of maintaining and supporting secure infrastructure in-house.

By adopting a managed backup approach, you no longer have the worry and cost of purchasing, maintaining and supporting the secure infrastructure that you would otherwise need to deploy. This has obvious cost and resource benefits for you and your business.

### ✔ Only paying for the resources you use on a fully transparent basis.

You are only charged for the resources you actually use, on a per GB per month basis. That makes budgeting for our managed backup services easy, while also giving you the flexibility to scale according to your changing business needs.

### ✔ You can set your own Recovery Point Objectives (RPOs) and Recovery Time Objectives (RTOs).

Just as you would backup up your applications and data in-house, you can set your own recovery point and recovery time objectives as per your business priorities and data protection compliance needs.

### ✔ Highly secure, reliable and easy to manage backup services.

You get recovery and restore assurance as standard, backed by an agreed service level agreement (SLA). Backups are validated, fully encrypted and always performing within acceptable tolerances.

Discover how you could benefit from our managed backup.

We will carry out, monitor, support and manage your backups 24x7x365.

Discuss your Managed Backup needs by calling us on +44 203 034 2244 or +1 323 984 8908, or emailing [hello@cardonet.com](mailto:hello@cardonet.com)

## Managed Backup Features

- ✧ We utilise leading technology and processes to safeguard your data.
- ✧ Your data is encrypted from end-to-end, including while at rest.
- ✧ Enjoy a flexible deployment model specific to your business needs.
- ✧ Complete monitoring of your backups 24x7x365 by our experienced team.
- ✧ Support for a wide range of operating systems, applications and data.
- ✧ Use of advanced, high-end server and storage infrastructure.
- ✧ Deduplication and compression to reduce backup times and costs.

## Managed Backup Options

- ✧ Options for multi-site data copies, as well as long-term retention.
- ✧ Options for ad hoc and manual backups when required.
- ✧ Options to backup your applications and data at intervals to suit you.
- ✧ Extensive disaster recovery (DR) and business continuity options.

## Our Technology Partners

## Allowing you to do more

- » Your **backups** become both **reliable** and **simple**.
- » You know your **backups** are **secure** and **off-site**.
